DOG-ON-IT PARKS CARE & MAINTENANCE

Maintenance Instructions

Your Dog-ON-It Parks equipment was built using the highest quality materials and was designed for heavy duty use in public parks and off leash areas. Like your car, a little maintenance will help prolong the life and appearance of your product.

Equipment Maintenance

- Inspect and tighten all hardware on a regular basis. The frequency will depend on the level of use and age of the equipment.
- Moving parts need regular inspection for wear. Replace hardware and worn parts after showing approximately 1/3 wear.
- Touch-up any damage to finishes. Repair material can be ordered from Dog-ON-It Parks.

Equipment Cleaning

- Hose off any surfaces that accumulate dirt or debris for better traction.
- Biodegradable detergents such as Simple Green can be used with a nylon bristle brush to scrub the equipment. Rinse well after cleaning.
- Power washers may only be used *with caution*. Do not exceed 1200 psi and never place nozzle closer than 12" from the equipment.
- Hose off equipment on a regular basis to prevent growth of bacteria, algae or mold.
- Avoid using chlorine bleach to clean the equipment because it may cause
